gmail@metlinskyi.com

My specialty is Asp.Net full-stack software engineer.

I have wide experience in different information technologies and stacks such as ASP.NET, .NET Core, SQL, JavaScript, HTML, CSS, Docker etc.. My main programming languages are CSharp (C#) and TypeScript (TS), also I like Python, and C++.

Barclays / Senior Csharp Developer, AVP
FEB 2021 - APR 2024, REMOTE, CZECHIA

During my work at Barclays I was involved in three projects. Two of them involved processing marketing data. The first was implemented as an Add-In in Excel (C#, VBA), the second as a WPF application (C#) and both were oriented on data visualization. The last project was a web application (C#, TS, Angular) for managing, snapping, rolling, recovering data etc.

FNZ / Senior Analyst Developer
NOV 2019 - JAN 2021, BRNO, CZECHIA

Analyst developers at FNZ are all-rounders who analyze required system changes, design databases (MSSQL), write complex financial business logic and create slick web applications (C#/VB, Asp.Net MVC, React). They also work closely with analyst testers and other members of the project team to produce world class software. Analyst developers will be expected to learn all about our application, the business and the industry we operate in.

Moneyveo.ua / Senior Software Engineer
APR 2018 - MAR 2019, KYIV, UKRAINE

My position was a senior .NET engineer. My responsibilities were solving different challenges, such as improving new business features, refactoring and supporting legacy code, and collecting big data under a high-load system. SOLID and Unit Tests covering (NUnit) are helping me to solve everyday challenges. The IoC container allows me to make solutions more flexible. A code review process is giving me information regarding improvements in my decision. Daily meetings and retrospectives allow me to keep in touch with a team. In a development process, I use a scope of technologies: C-Sharp (C# 7), ASP.NET MVC and Web API 2 frameworks, Autofac, NHibernate ORM, message broker RabbitMQ, SQL server 2014/17, Docker, Mercurial, Jira.

Education

Dnipro University of Technology / Bachelor
SEP 1999 - MAY 2004, DNIPRO, UKRAINE
